**Manisha Sharma**

Teacher

I am Manisha Sharma teacher of my kids pre school. I have been teaching in this school from the last six year. It's my proud privilege to pen down the message for the school magazine. As preschool plays a very important role in building the base of the children. It is the first place where after leaving the warmth of their mothers lap and so the top most concern of the parents is the safety along with the development of their personality. Needless to say, the pandemic has changed or we can say transformed the old method of teaching from chalk talk to technology. In this hard time parents and teachers are making number of efforts to give best to the kids. As a teacher it gives me a great pleasure and satisfaction to be the part of the institution and and so happy for the kids who received education here. Thank you

**Shreni Singh**

Teacher

Myself Shreni teacher. I am sharing my experience as a teacher. There is no better teaching practice than experience . Everyday's different and exciting teaching is an interesting art. I feel there are so many things to learn from it for me. Student are great source of Inspiration. They bring in new information new perspective and a new points of view. While my journey I have a beautiful experience in my kids' preschool .One more unexpected and challenged experience is the covid-19 pandemic has disturb the education of children. Classes have been suspended to follow social distancing. So we take a initiative to take online class. It is a big challenge for me and for all the teachers and also for students too. Parents also face problem . Online teaching is something which give alternative to continue providing education to children. I have also face many challenges apart from technical issue . I have a great experience. All the teachers and team make learning possible for all the children's without any hurdle . Thankyou

**Isha Goel**  
**Head, my kids' preschool & AIIS**

As you all know that we run Montessori education based preschool and our source of inspiration is Dr. Maria Montessori who originated this Montessori methodology. During world war when many people died, their kids became orphan. It's the similar situation we are in for many and it's quite painful. Education is the only way forward for young minds and Dr. Maria Montessori did same. In her book "Education and peace" she has written how through education peace in society and peace in child's mind can be achieved. In these extraordinary circumstances the preschoolers have also suffered badly. As the schools are closed for more than a year their very important phase of growth year is passing without much development. As we know preschoolers are in the once in life time development phase. Many parents who understand and have resources, give priority and importance to their little ones development with whatever sources available and possible. But many parents who do not have understanding of importance of preschooling, they choose not to go ahead with whatever possibilities of development are possible in this situation. There may be various reasons for that like financial, health, ignorance of importance of preschooling etc. But in this entire scenario the ultimate loser is the child. Unfortunately in our country importance of Preschooling and understanding of development at this stage is yet to be understood. Things are defiantly changing in big cities because of their exposure to international scenario and access to right information. It is yet to be understood in small cities and villages. A nation builds on its child education system, the kind of foundation they get in that country, a nation becomes that. You pick any country and you will find if the country is developed, its preschooling education and infrastructure is very sound. I hope soon India will also understand these facts and things would change. In the NEP(New education policy) also government has tried to touch upon this issue and with the real implementation we will be in the position to access the positive changes it may bring .

I request all the parents to be safe at your home. Keep your child and family safe. Get vaccinated as soon as your turn comes up. Soon we will see a fresh tomorrow and we can't wait to welcome our small kids, we are eager and excited to see smiling faces of our little ones. Hope that day will come soon when parent will be feeling safe in sending their cute kids. Take care. God bless. Jai Hind.

# FROM THE DESK OF FOUNDER

## WUHAN VIRUS- CERTAINLY MAN MADE WEAPON OF MASS DESTRUCTION

**MR. ARUN GOEL**  
FOUNDER, MY KIDS' PRESCHOOL

Namastute, vasudhaiva kutumbakam!!!.

After long time, got the opportunity to pen down the thoughts again. It's been a terrible last one and half year. The whole country is at war and world is disturbed by covid-19. If 1st wave was bad, 2nd wave has been worse and with the fear of 3rd wave, situation can be worst. World is no more same. Everything around has been changed and has been changed forever. It's a big grief to see that lakhs of people are now no more with us. Our beloved coordinator Miss Swapna Lakra also could not bear pain of this world and left for the heavenly adobe. Demise of her has shocked everyone in our my kids' and adwitiya family. She was like a cheerful and lively child who could bring smile to the face of anyone, be it kids or parents. Her loss is something we will never be able to forget. We all miss you Swapna.

In this covid times, many inhuman acts have been performed by many individuals. Black marketing for getting bed in hospitals, getting oxygen, getting remdesivir and other medicines. 2 times to 20 times amount has been charged for these by many black marketers. It went to this low that they overcharged even for the rituals to be performed for the dead. This inhuman and dark side of people has really made situation further bad.

In this hopeless situation when we turned our head towards governments, we realized that they are busy playing some other games. It seemed for them people dying is just a number. It was really frustrating to see the irresponsible arrangements and responses of the people running the state and country.

If one truth is this, the other truth is opposite of this. Suddenly numerous real life heroes emerged. There were many people who without fear of this pandemic, supplied oxygen to the needy, free food were distributed to poor and to covid affected families. Arrangements of ambulance, blood, plasma and whatever required and possible has been done by millions of volunteers. They showed what humanity is. They really outnumbered in big quantity who were trying to profiteering, black marketing of anything and everything. It really showed that still Humanity is left and we are safe in this planet.

The kind of work front liners has done is amazing. Doctors, nursing and other staff of healthcare, housekeeping guys, drivers who run day and night in ambulance or carrying cylinders or even dead bodies. All these people are true heroes. Unfortunately they will never get their dues as ever.
